Hands Down Software Receives ASHRAE Psychrometric Chart Order

(EDMOND, OK) – Hands Down Software, an Oklahoma S-Corporation d/b/a/ Hands Down Software, announced it has received order commitment confirmation from ASHRAE to purchase copies of the HDPsyChart Professional Engineering Edition displaying the ASHRAE psychrometric charts. "Our staff has been developing psychrometric charting software for over 13-years and we have successfully established a strong position in the HVACR industry" said Robert Hanna, President and Chief Executive Officer of Hands Down Software. "We're very pleased to be providing ASHRAE copies of this very powerful and useful program."

ASHRAE Technical Committee 1.1; "Thermodynamics and Psychrometrics" will be working with Hands Down Software, performing thorough technical review of the product. "This agreement will bring the classic ASHRAE charts into the 21st century, empowering them with the full capabilities of the HDPsyChart Professional Engineering Edition" said Robert Hanna.

The Professional Engineering Edition includes a stand alone psychrometric calculator, outside air climatic design data for over 1,400 cities throughout the world, fresh air estimator for indoor air quality and fully documented on-line help.

HDPsyChart features include turning lines on/off, complete data and graphic exchange with any other Windows programs, full note control, presentation color control, full state point and process report. Process modeling includes cooling coil with proper cooling coil curves, air mixing, desiccant dehumidification, evaporative cooling, sensible cooling & heating and humidification.

Hands Down Software is one of the world's leading companies specializing in psychrometric analysis software for many applications including air conditioning, heating, ventilation, and refrigeration.
